

DFS & NEHP collaborate on Chemical Blending System

DFS & NEHP Chemical Blending System

DFS & NEHP team up to provide chemical blending system to be used on a nationally renowned research university campus

Collaboration:

DFS and NEHP in association with leaders in the semiconductor industry including one of the Nation's top college for nanotechnology and ® microtechnology, and a leading semiconductor manufacturer joined forces to provide to provide a multi-million dollar product solution to a notionally renowned research university's campus.

The result:

The end product of this collaboration was a multi-faceted high-tech chemical blending system to be utilized in their institutional services division.

These systems are Semi Certified by a third-party and are certified in the following SEMI standards: S2, S8, S10, S13, S14 and F47.

For DFS, this is the largest single contract awarded since the founding of DFS in 2009. This project generated significant revenue for the Treasure Valley and resulted in more than \$1.5 million worth of business brought directly to the economy of Idaho.
