December 15, 2013

Large European Biologics Firm Selects Critical Process Systems Group:

Critical Process Systems Group (CPS Group) has been selected and begun production of custom engineered utility panels to support the establishment of a first of a kind European biopharmaceutical products manufacturing facility based on disposable processing technology. For our Confidential Client this facility marks a major milestone towards the mass production of biologic drugs including innovative products and biosimilars. Through this project the company will be able to deliver innovative medicines for the treatment of many socially significant diseases.

The plant, scheduled to be operational in 2015, will be certified to meet International and US FDA and GMP requirements. Facilities currently operated by our client have successfully passed audits and evaluation visits from some of the World's largest Bio/Pharmaceutical companies including Abbvie, Amgen, Astellas, AstraZeneca, BMS, Boryung, Dr.Reddy's, Eli Lilly, Ferring, Glaxo Smith Kline, Johnson & Johnson, Mallinckrodt, MSD, Pfizer, Roche, and Sanofi.
